 - Powder Coating
 - Screen Printing
 - Assembly/Kitting
 - Delivery/Replenishment

Your Global Provider of Custom Metal Fabrications and Precision Machined Products

Ometek, Incorporated, is a full service source for the fabrication, machining, welding and finishing of precision parts and assemblies, and has been in operation since 1977. In addition, Ometek Inc. can provide value-added assembly of electronic or electromechanical components, as well as provide logistical support activities.

Ometek, Inc. continues to grow and gain sophistication in production and finishing of enclosures, chassis, brackets, front panels, bezels and other component level assemblies for a growing group of OEM firms. We have experience working with materials ranging from steel, aluminum and copper to phenolics and other plastics. Ometek's capabilities range from large to small jobs. Equipment includes laser and water jet cutting, CNC punching, forming, milling and turning machines, all with the latest computer controls. Materials inventory includes steel, HR & CR., stainless steel, aluminum, copper, galvaneal/galvanized, aluminized, and plastics.
